A full line of the following powders always on hand, viz:—Dupont's Domin-
ion Rifle, Manitoba Sporting, Curtis & Harveys',
Schultze & E. C. Smokeless Powder.

Gun Repairing.

Guns for hire at Brass Tin Shop

F. A. MELLER.

THE MANITOBA ELECTIONS

THE GREENWAY GOVERNMENT
SUSTAINED.

Two Ministers However are
Numbered Among the Slain.

THREE OPPOSITION LEADERS
ALSO AMONG THE FALLEN.

The Prohibition Plebiscite Carried
Overwhelmingly.

This hardly fought contest is over. Throughout the campaign the opposition made every effort to secure the reins of Government, yet as we predicted in our issue of July the 1st. Mr. Greenway has been returned to power by a good working majority. It is alleged that the Government illegally spent large sums in several of the Constituencies, to insure success, in fact literally purchased the election for their candidates. That in every case where the Opposition candidates were regarded as winners, money was lavishly used against them and their defeat secured.

Notably so, to secure the defeat of Roblin, Hagel and others who were regarded as the leaders of the oppositionists.

That in every case where the Government considered its champions safe and therefore withheld from them a share of the needful, the Opposition were victorious.

We are unable of course to ascertain the truth or falsity of these allegations. The election courts will determine this.

All we can say is, that after a most spirited contest the next Manitoba Legislature will stand about 25 Government, 14 Opposition and one Independent. This is a gain of three for the Opposition. Roblin, Hagel and Rogers, all three Opposition leaders, are defeated, and on the Government side Smart and McLean, Cabinet ministers, are slaughtered.

The prohibition plebiscite carried throughout the province by a big majority.

In the city of Winnipeg the majority for the Government was 1,473.

Now that the Government has a majority it will be interesting to observe the course which will be pursued by it in regard to the question of National Schools Prohibition and other political assurances made during the campaign.

FATAL RAILWAY ACCIDENT.
On the Bay of Quinte Railway
at Erinville.

DESERONT, July 21.—We have the following report from the scene of the accident:—A collision occurred this morning on the Kingston, Napanee & Western Railway, about 7.10 a. m., between Marlbank and Erinville between a light engine and the regular morning train. The engineer of the regular and the fireman of the special were killed, and the engineer of the special and the fireman of the regular were seriously injured. There were three or four passengers slightly injured. The locomotives were considerably damaged, the cars remained on the track but slightly damaged. The names of the killed are:—William Christie, engineer; William Hardy, fireman, of Tweed, and the baby of Mrs. Naphin, of Deseront. The names of those seriously injured are:—Chas. Kirby, engineer; Thomas Watson, fireman, and James Mumble, brakeman.

C. P. R. IMPROVEMENTS.

The Canadian Pacific Railway Co., true to their past record, are this year moving forward at this place as elsewhere and are making extensive improvements. They are this season engaged in straightening their line of railway from Broadview to Swift Current and at the same overfencing the somewhat heavy grades which at present exist at several points on these divisions. They will thus not only shorten the distance between these places but render it possible to draw heavier loads over their road. They have this season enlarged their garden at this place from three to seven acres and have planted out in the enlarged space between three and four thousand trees, including 1200 balsam of gilead, 1000 maples, and a smaller number of each of the following varieties of trees viz, poplar, willow, Biga pine, white spruce, white cedar, mountain ash, Russian mulberry, white ash, black birch, etc. Those planted two years ago show remarkable growth and vitality. They have also on their grounds some 80,000 seedling maples which are making excellent progress. One has only to pay a visit to this garden to be convinced that trees will readily grow in this part of the North West Territories if they have anything like a fair show and to realize what a thing of beauty it will be in the near future.

In the centre of this garden, where waved for the first time on Dominion Day the Union Jack, stands a "British Columbia tooth pick," one hundred and twelve feet in height. The dowers in both the large and small gardens are now in full bloom and are the admiration of all passengers over the road.

The stock yards have had new doors throughout and the walls whitewashed and now rank amongst the best stock yards in Western Canada.

The Assistant Superintendent's, his Chief Clerk's and the Train Despatchers' offices have all been enlarged, thoroughly overhauled and newly painted.

The Round-house is having a new floor and roof, and is being put in a thorough state of repair.

The small pipe leading from the tank to the round-house has been taken up and replaced with a three inch cast iron pipe.

The house and elevator siding, laid last autumn, has been recently ballasted and put in good order.

It is the intention of the Company to shortly construct a much larger dam at this point further up the stream than the present one with sluice gates.

This will greatly improve the quality of the water supplied to the workshops and engines here.

NOTHING BUT ASHES.

All That Is Left to Mark a Prosperous Wisconsin Town—
Suffering among the People.

IRON RIVER, Wis., July 24.—With the exception of one or two buildings this town is in ashes. Fifteen hundred people are without shelter and in many cases without food. Little is left of what twenty-four hours ago was one of the most prosperous mill towns. The total property loss aggregates \$200,000 with very little insurance. The fire started in a hotel and in less than five minutes the structure was ablaze. As there is nothing in the town in the way of fire fighting apparatus or a stream near by, the fire spread rapidly. General Manager Fitch of the Duluth, South Shore and Atlantic has taken measures to relieve the distressed people. To-night men and women are huddled about the ruins of their homes. Many of the poorer residents are absolutely destitute. A few people have sought refuge in the saw mill near the town. Such as saved provisions from the flames are dividing with the less fortunate, but even this does not prevent many families from going hungry.

DUGALD CURRIE'S DEATH

On Saturday afternoon of last week, Mr. Dugald Currie, while under the influence of liquor, was thrown from a wagon on River St. sustaining injuries which at the time were thought but slight. He was removed to the Brunswick Hotel where, during the night, he died. The remains were buried in the new Cemetery on Sunday.

It is worse than useless to attempt to dissociate this death from its direct cause—whiskey and the whiskey traffic. It is a mistaken notion of what makes for the public weal, or serves the tender interests of charity, that prompts men to append to the publication of such a mournful occurrence, the misleading statement "cause unknown." The cause is known; and the horror of the death is thereby vastly increased. A victim, would that we could hope it should be the last, has been laid on the shrine of the Licensed Liquor Traffic. Surely the greed of the monster could not be long restrained.

A few months ago when under nominal prohibition, a prohibition law that received no semblance of enforcement, and when the near advent of a license system emboldened the illicit traffic, it was thought by many that license could no worse, might possibly be an improvement and ought at least to have a trial. We have now a license act, claimed by its advocates to be the best possible, and what is the result? Within three months, to say nothing of temptation placed before the weak, street drunkenness is largely increased and one soul thrust into Eternity. Summing up both sides of the question even nominal prohibition is better than the most carefully devised license system.

It is said that prohibition did not prohibit, that men got drunk under prohibition as well as under license. Quite true. So long as men are willing to forego their manhood and violate the laws of God and man in order to gratify a depraved taste for intoxicants; and so long as others are willing for filthy lucre's sake to pour their vile deceptions into the stomachs of their fellows prohibitory liquor laws will find their obstacles. How can it be otherwise? How can we expect a vice that has been protected and fostered for centuries, by legal enactment and social custom, until it seems to have become part of our nature, to be eradicated by a single sway of the legislative wand? The evils of the liquor traffic are not to be killed in a few years. It will require at least fifty years of stringent enforcement to disprove the validity of the principle of prohibition.

Whatever may be our views as to the right of parliament to restrict the sale of liquor, the evils of intemperance are admitted by all. There is but one absolute safeguard against these evils; and that is not in the line of the moderate use of, but total of abstinence from the intoxicating cup.—*Con.*

DEATH BY DROWNING.

Malcolm Urquhart, a Hudson's Bay Officer, Drowned at Fort Qu'Appelle.

The Fort Qu'Appelle residents who arrived from the west yesterday to attend the Industrial exhibition received sad news on reaching Winnipeg, a dispatch informing them of the death by drowning of Malcolm Urquhart in Qu'Appelle lake. Deceased was accountant of the Hudson's Bay Company, at Fort Qu'Appelle, and was highly esteemed by all his fellow employees. He was about 24 years of age and had only been cut from England for about a year.

Laurier's Resignation

The report that Laurier would at once resign the Leadership of the Reform party has been positively denied.

SMALL-POX ON THE COAST.

Statement of the British Columbia Health Officer.

VICTORIA, B. C., July 24.—The following is the provincial health officer's on small pox issued at midnight last night:—"Provincial Health Officer, midnight, July 25, 1892.—No cases in city or district, New Westminster, two cases in city and two in districts—no new cases reported; Moodyville, one case, strictly quarantined; Vancouver, nine cases—two new cases reported to-day; Victoria, Alberthead quarantine station, twelve miles from Victoria, twelve cases; Jubilee quarantine hospital, two miles from the centre of the city, forty-three cases. The new case is Mrs. Cameron, who has developed a mild attack of the disease from inoculation while attending her son; Victoria City, no cases, no deaths; no cases in city. (Signed), J. C. Davis, Provincial Health Officer."

SMALL-POX AT GREYNA.

A Neche, N. D., dispatch says: Not until last night were the citizens of Gretna informed that they had three bad cases of small-pox in their town—two Chinamen and one little girl who had been accustomed to taking milk to their houses. Since then three more cases have been added to the number, and one case is reported as Mordan, Man. A Pembina county physician has been notified to quarantine the town. Until his arrival all possible means will be used to cut off travel between Gretna and this place.

BOAT RIDE ON THE MOOSE JAW.

A critic (says the Regina Leader of the 25th inst.) in the East who can speak on literary subjects with authority, writes us respecting "An Evening Boat Ride on the Moose Jaw," which appeared in our issue of July 11th. (The same being copied from our issue of July 1st.)

"I read with great interest the poem on 'An Evening Boat Ride on the Moose Jaw,' in your issue of July 11th. The author is no doubt a young poet and there are some faults of technique but that is a small matter compared with the deep poetic feeling and the rich and varied music which pervade the little idyll. Rarely has the stanza which Gray made immortal in his famous elegy been used with more success. The writer has a fine ear and an eye and temperament responsive to the sights and sounds of nature. An iambic line will bear a spondee in the first foot without losing its stately march—may, gaining thereby, but not a trifle. There are five lines in this poem commencing with a trochee—the first two, the 25th and 29th and the 38th, and although they are good lines taken separately they detract from the effectiveness of the stanzas in which they are found. In the first stanza not much harm is done, because the third line commencing with a spondee and the caesura in the second line coming after the second foot the jerk is not felt, but in the seventh stanza where the caesura in the second line as well as in the first is in the middle of the third foot the jerk or drop is painfully felt:

Over the rippling waters I did glide,
Followed the frequent windings of the stream
A fair form chatting gaily by my side,
The pleasant moments flew like some fond dream.

If the trochee in the second line is replaced by either an iambus or a spondee euphony will be purified. The same remarks will apply to the last stanza. If instead of "sadly," a trochee—you read "and sad," an iambus, or "all sad," which partakes of a spondaic character the effect will be seen. Instead of

Dull, gloomy darkness soon o'ertook the light,
Sadly I rowed me on my homeward way,
Too soon the gleaming faded into night,
And from my sight the sweet scene passed away.

"Dull" being so much stronger than "gloom," it gives the first foot a trochaic character. But read:—

Now gloomy darkness soon o'ertook the light,
All sad I rowed me on my homeward way,
Too soon the gleaming faded into night,
And from my sight the sweet scene passed away.

It is not often that a stray contribution to a newspaper displaces such promise as to make it worth criticising. But this poem deserves it.

FRIDAY, JULY 29, 1892.

TARIFF CHANGES.

Previous to the close of the last session some little time was bestowed upon a slight revision of the tariff. Few if any of the changes are sufficiently sweeping in their character to materially interfere with any line of business. The duty of five cents a dozen on eggs is a leading feature of the new schedule. Our neighbors taxed our eggs five cents under the McKinley tariff, thus aiming a blow at the Canadian farmers. Now Mr. Foster returns the compliment by levying a similar tax upon eggs imported into Canada, the large proportion of which come from the United States. The average importation is 650,000 dozens annually. Ontario takes a hundred thousand dozens. Quebec a hundred thousand, and British Columbia two hundred and fifty thousand. The new tariff levies a tax of about \$32,500 upon the egg importations. It is represented that the duty will protect the Canadian farmer, thus keeping his prices up.

Another feature of the new tariff deals with the duty on molasses. There is now a tax of one and a half cents per gallon upon molasses testing from forty to fifty-six degrees, while upon molasses testing below forty degrees there is an addition of a quarter of a cent to one cent a gallon per degree. It is proposed to discriminate more thoroughly against molasses of a low grade. These duties, however, apply only to molasses imported direct from the country of production. When transhipped or brought from countries other than those in which they were produced, the charge is two and a half cents per gallon additional.

Sugars below the standard of No. 14 Dutch come in for similar discrimination. Such sugars as come direct from the country of production are free; whereas if there is transshipment there is a tax of five per cent, ad valorem. The new scheme gives the Governor General in Council power to order that the discriminatory duties be not imposed upon molasses and sugar not coming direct from the country of production. Another interesting change is that which enables the Government to reimpose the old scale of duties upon the sugar and tobacco of such countries as do not give our products favourable treatment in their markets. This project is an initiation to the reciprocity clauses of the McKinley Act. The McKinley scheme, while not producing discrimination against us in the British West Indies, has secured for the United States preferential treatment in Brazil, in Porto Rico, and more recently in Cuba.

For some time Mr. Foster was in doubt whether in the case of Cuba we really were on a tariff footing different to that afforded the United States. But he evidently believes now that we are thus discriminated against, and that the minimum tariff which applies to us is higher than the tariff our neighbors have secured. It is intended by the granting of the Government of the power to restore the duties upon Cuban and Brazilian sugars to say to Cuba and Brazil that unless they treat us as well as they treat the American, who also accept the sugars of these countries free, their products will be subject to higher duties in Canada than are those of the British West Indies, where we meet the Americans on equal terms. Our trade under nominal conditions has been two millions a year with Cuba, and \$600,000 with Brazil.

LOCAL MANUFACTURES.

Industry creates wealth, but economy and thrift accumulate the reserve stock which makes individuals and communities wealthy.

Our soil is wonderfully fertile and it is being industriously cultivated, but the returns therefrom, being put to the most judicious use. Our people find it convenient to buy clothing and foot wear and also many articles of diet as they are imported from the east. It is a necessity of our condition at present that we should do so, but how long will this kind of thing last? Not for many years can we afford to buy the bulk of the goods we consume, and pay the eastern price plus the cost of transportation for thousands of miles, while we sell the bulk of what we produce at eastern prices minus the cost of similar transportation. If people here are to prosper they must furnish themselves as soon as possible with a home supply of a portion of clothing and a home market for a considerable proportion of cereal crops as well as their beef and mutton.

We have already referred to the facilities we possess for the manufacture of cloth.

What is to be done with the hides of beef animals and with sheep pelts. Let it not be supposed that all the cattle upon four thousand hills are fabled time to be sold on their legs. An increasing number will be slaughtered for home consumption if not for export in a more condensed form than whole carcasses. What is to be done with the hides, horns, hoofs, etc. "There is nothing like leather," but when we buy all our boots really made we don't always get what we pay for. Well enough for a while in our present transition state to carry off articles of body wear made of the skins of animals from the east to be sold for in No. 1 hard at 10 cents a head over the cost of production but it won't last long.

Let us encourage some skillful dresser of lamb skins, of calf skins, of dog skins, to establish the manufacture of home grown fur goods on a somewhat extensive scale, and see how rapidly a little industry can be developed that will save thousands of dollars in the clothing of the people.

As regards leather proper, will some one practically posted rise and explain if there is any permanent obstacle in the way of our manufacturing at least the coarser or heavier kinds of leather goods from the hides which must ere long be shipped, used at home or wasted. If we have the raw material, a local demand and the motive power, capital and skill should gravitate to this centre according to commercial law.

MINORS AND FIREARMS.

The provisions of the new Criminal Code with respect to the sale of firearms to minors are far more severe than most people imagine. One clause says: "Everyone is guilty of an offence, and is liable on summary conviction, and is liable on summary conviction, to a penalty not exceeding \$50, who sells or gives any pistol or air gun, or any ammunition therefor, to a minor under the age of sixteen years unless he establishes to the satisfaction of the justice before whom he is charged that he used reasonable diligence in endeavoring to ascertain the age of the minor before making such sale or gift, and that he had good reason to believe that such minor was not under the age of sixteen." Another clause says: "Everyone is guilty of an offence, and is liable on summary conviction, to a penalty not exceeding \$25, who sells any pistol or air gun without keeping a record of such sale, the date thereof, and the name of the purchaser, and of the maker's name or other mark by which such gun may be identified."

INFORMATION REGARDING THE DISTRICT.

Those who come in contact with the men arriving in this country in search of land on which to settle, realize the fact that more in the way of what may be called preliminary information is needed by this class of people than has yet been provided by those whose duty it is to encourage immigration.

In many cases it is really when they arrive in the district that they find out the character of the soil and

climate and its adaptability to the different kinds of farming.

At small expense such printed literature as is employed by other districts in the Northwest could be distributed in the east and on west bound trains. The results accruing from a little time and money spent in this way would far outweigh the cost.

EDITORIAL NOTES.

Mr. Mitchell, M. L. A. for the electoral district of Mitchell, has been appointed a member of the Executive committee in place of Mr. Cayley, resigned.

Enquirer as to the rumor that Lord Stanley of Preston intended resigning his position of Governor General, proves that the report was mere conjecture and that it contains no truth whatever.

The journals of the first session (1891-2) of the second Legislative Assembly of the North West Territories have just left the hands of the printer. The work has been done at the Standard Office, Regina, and the result is a readable volume of upwards of two hundred pages, neatly printed.

Every measure possibly has been taken by the immigration department that can be taken to guard against an outbreak of small pox in the Northwest. Agents in the Territories have been instructed to keep their Indians upon the reserves and are being supplied with vaccine as fast as they ask for it.

Among the visitors to Banff is Mr. Farnham Day, of the Royal Military College, Kingston, Ont., an artist of recognized position whose paintings are held in high esteem by cultured critics. Mr. Day is spending some time in Banff and will give the world some clever reproductions of the magnificent scenery of the National Park.

Commissioner Herchmer, in his report to the Government, says with regard to "Deferred Pay," in the police force: "I would again bring to your notice Superintendent Steele's suggestions on this matter; that instead of adding a man's good conduct pay to the amount handed him every month, it be held over as deferred pay, so that at the expiration of his term of service there would be, in spite of himself, quite a sum of money coming to him. This would also have a salutary effect in putting a stop to desertions; \$15 a month is quite sufficient for a constable's needs in this country, and as a rule the balance if spent at all is practically thrown away. Men, however, who happen to be married might be permitted to draw their full pay."

A reciprocity convention arranged by the Chamber of Commerce of Grand Forks, N. D., will take place on Sept. 1st and 2nd. The commercial bodies of Minneapolis, St. Paul, Duluth, West Superior, Detroit, Buffalo and other cities in the north-western states and on the Canadian frontier will be invited, as also delegates from Winnipeg and all Manitoba points. The railroad officials have asked to be allowed representatives.

The extension of trade relations, lake navigation and a deep water channel to the sea will be the leading features of the proceeding.

A St. Paul newspaper discussing the proposed convention, says: "The invitation extended by the chamber of commerce of Grand Forks recently to the other commercial bodies of the North West to meet in conference in that city on the subject of reciprocity with Canada is a movement which should commend itself to all whom the invitation has been addressed."

It will be noticed that the call discusses only the feasibility of securing reciprocity between the American and the Canadian North West. Many who, on the broader question of reciprocity between the two countries are not favorably disposed, can with perfect right engage in the movement originating at Grand Forks. Consul Taylor, and others of Manitoba have been invited to address the convention.

The Toronto World, in a recent editorial states: The Globe tells us that harvesting has begun in Kansas and that the wheat crop will be the largest in history of the State—about sixty million bushels. The farmers are crying for harvest hands and 20,000 could find work. The paper after this fulfils a gleam of cheerfulness over the happy condition of Kansas, turns its face to its own land and immediately resumes its wretched gloom. Here all is rain, floods and swollen rivers. If the reports of plenteous crops reached the organs from our Northwest it would either ignore them or warn us that the information should be largely discounted, owing to the boom propensities of the Northwesters. But bless your heart they swallow the Kansas estimates without even demanding a one per cent reduction. Of course Kansas boomers would never think of overstating the crops. The World hopes that the estimate is a true statement of facts, for from all it can hear the people of that unhappy state in common with the rest of their western fellow countrymen are in a sad way. From where does the loudest cry of distress proceed in the United States? Why, from the western grain states. Where does socialism and its literature appear to find most acceptance? Why, from these new rich prairie lands which have scarcely yet become used to the poverty of the plow. Where do the fads of free silver paper money and People's parties (all sure signs of social and financial distress) find the warmest acceptance? Why, in these virgin acres west of the Mississippi river. From that region comes a steady howl against railroad managers, bankers, mortgage companies and other organizations of capital.

Campbell's Hall

ONE NIGHT

ONLY.

SATURDAY EVE.,
AUGUST 6TH, 1892.

"Hence, loathed melancholy,
Of Cerberus and blackest midnight born
In Stygian Cave forlorn!
Dwell in some uncouth cell
Where brooding darkness reveals her jealous wings,
And the night raven sings;
But come, thou goddess dark and free,
In heaven yoked Euphrosyne,
And by moon-light leading Mirth."

The Moose Jaw Times.

FRIDAY, JULY 29, 1892.

LOCAL AND GENERAL NEWS.

Mr. W. P. Shaw of the Lake of the Woods Milling Co., was in town on Saturday.

Mr. Derrick Moore's brick residence on River St. east is rapidly progressing.

Miss Maud Ostrander, who for the past few weeks has been visiting in Brandon, returned home on Monday morning.

Mr. James Hastings, of Indian Head was in town on Friday looking after some lost horses.

A fine refreshing rain fell Tuesday night. It will do a great amount of good to the growing crops which greatly needed it.

Mrs. Galbraith and Miss Maggie Bogue of Bowmanville, Ont., are at present visiting Mr. and Mrs. Bogue here.

The Legislative Assembly for the North West Territories has been summoned to meet for the despatch of business, on 2nd August.

Mr. W. J. Bradshaw, contractor, began on Wednesday to erect the new bridge over the Moose Jaw Creek, to the east of the town at the foot of Manitoba St.

Mr. and Mrs. C. Nicolle and youngest daughter from Mapleford, left on Sunday's train and are taking in the Winnipeg exhibition this week.

The Government Homestead Inspector, Mr. John Rogers, has for ten days been in this district attending to the wants of his settlers. Making inspections, taking applications for patents, etc., to the great delight of all those who had business to transact with him.

Mrs. Hubbell, formerly of Moose Jaw, had a rather peculiar experience recently at her home in Brandon. On returning home from church she spied a man concealed behind a screen in the parlor. Without saying a word she walked upstairs and returned with a loaded revolver and ordered the fellow out. He obeyed with alacrity. Mrs. Hubbell fired a couple of shots after him to hasten his speed. The average woman would have fainted.

The annual picnic at Buffalo Lake took place in Mr. James McCoy's grove, on Wednesday last. The picnic was a grand success. A game of base ball was played between the Caron and Buffalo Lake clubs, resulting in victory for the latter. A fine dancing platform was erected, and suitable music provided, which enabled the younger class to heartily enjoy themselves. Mr. Thos. Healey's booth, was the main attraction of the day, he having provided temperance drinks of all sorts.

A large number of persons from this town and district have gone to Winnipeg to attend the exhibition, viz:—Mr. and Mrs. T. W. Robinson, W. A. Burton, Miss Annie Smith, H. C. Gilmore, Mrs. Pascoe, W. C. Sanders, R. H. Holt, Hamilton Lang, W. W. Bole, Miss E. King, Miss May McDonald, Misses Roxy and Mary Alexander, Miss Annie McBride, Mrs. Wm. Murphy, Mrs. McFall and Mr. J. S. McDonald.

Mr. Herla McDonald of Varden, Man., is visiting friends in town this week.

W. D. Palmer, River St. East, sole agent for the Karn Organ. Received highest award and latest medal over all manufactures in Canada. Heintze man Pianos, Raymond Sewing Machine Needles on hand. Oils a specialty.

Very encouraging reports of the general condition of the crops in the district have come to us. The late rains have greatly assisted the growth. The farmers are now more sanguine of a satisfactory yield of grain.

Miss Annie Smith the daughter of the genial host of the Dining Hall, left on Tuesday for Winnipeg and Portage la Prairie on a pleasure trip. Miss Smith will attend the exhibition at Winnipeg. She is expected to return in a couple of weeks.

It would be a great convenience to the people of the town, if the Council would provide a Town Bell. Especially would this be, on the Sabbath day, to summon worshippers to church. The new Town Hall should certainly be provided with one.

On Tuesday 26th inst., before Seymour Green, J.P., Herbert Robinson was tried for unlawfully absenting himself without leave from the service of Henry Checker, on the 16th inst., when he was fined \$10 and costs. He speaks of appealing from this decision.

On Monday 25th inst., Dr. Turnbull, Messrs. James W. Smith and Brine, License Commissioners for this district, met at Moose Jaw regarding the transfer from Hugh Ferguson to R. H. W. Holt of the Ottawa Hotel license. The transfer applied for was granted.

Edward B. Welsa, an old resident of this district but now of Vancouver, B. C., arrived here on the train from the west on the 27th inst. He reports things moving along satisfactorily at the coast. Passengers from the coast are, he says, boycotted at the Hat. He observes a considerable change in this town. He will remain here for a week or ten days.

Main street presents a busy scene at present. Mr. Bole's new building on the south-west corner of Main and River street is being rapidly pushed forward. On north-west corner of the same streets Mr. G. M. Amable is excavating the cellar for the new block to be erected. The foundation of Mr. McBride's new block is completed, on the west-side Main street. On High street Mrs. McFall's large building is being pushed forward towards completion. There are in addition some thirty residences all of a very superior class, being erected in the town.

On Thursday morning at Moosomin a burglary was committed at the Queen's hotel. After the circus party left, about one o'clock, Mr. Sidney Smith, the bar tender, went over the premises to see all was right, and retired. About 4 o'clock he heard a noise in his room, and on jumping out of bed he found a man going through his pockets. He ran after the prisoner who made for the cellar and escaped by the door. Sid. hastily dressed himself and got the assistance of the police, and together they gave chase and captured their man at Moosomin Lake bluff. Prisoner turns out to be a notorious burglar, known as "Reddie" and has only just completed a term of five years at Stony Mountain. The amount at present missed is \$14. The police afterwards found an accomplice of "Reddie's" lying drunk some distance up the track, and having the stolen money in his possession.

Anyone who doubts the possibility of successfully cultivating small fruits in the North West Territories would do well to pay a visit to the garden of Mr. R. Bogue. In it he will find the following varieties of small fruits, tame fruits: black, red, and white currants, strawberries, raspberries and gooseberries; and of wild fruits, black currants, gooseberries, raspberries and strawberries, and all of these growing in great abundance. To show that there is nothing exceptional in their growth this season we may mention that this is the fourth year of his successful cultivation of them. And what Mr. Bogue has done any settler may do. The conditions of success in his case have nothing exceptional about them. We are desirous of seeing his success repeated.

and their families to the west of the North West in proportion as they are able to have around them some of the comforts of life as well as the necessities.
